Application of Learnings from Leadership Modules

Leader in Me & Leading Cross Functional Teams

Top Learnings: Leader in Me

1. Leadership Styles
2. Upward Empathy
3. Paradoxical Leadership

Top Learnings: Leading Cross Functional Teams

1. Dysfunctional v/s High Performance teams
2. Microcultures
3. Influencing without authority (Cohen-Bradford Influence model)

Application of Learnings from Leadership Modules

Leader in Me & Leading Cross Functional Teams

Application example:

Models applied: Hersey–Blanchard (Situational Leadership) and Cohen–Bradford Influence model

▶ Objective: Restore a closed project by coordinating cross-functional support.

▶ Situation:

- ▶ A C#, .NET 8 project from another group was closed last year.
- ▶ The group dissolved; team members left the company.
- ▶ Early this year, bugs were reported on the closed project.
- ▶ No one in our department had the required C#/.NET 8 skill set.
- ▶ The fix was non-billable and our team had limited capacity.

▶ Constraints:

- ▶ No budget/billing for the work (non-billable).
- ▶ No in-house expertise/availability for C#/.NET 8.

▶ Why these models:

- ▶ Adapt leadership style to each person's competence and commitment.
- ▶ Influence across departments without authority to secure support.

Application of Learnings from Leadership Modules

Leader in Me & Leading Cross Functional Teams

► Actions taken

- Identified person A (medium competence, low commitment) who had briefly worked on the project 4 years ago.
- Engaged person A to help analyze the reported bug and outline the fix.
- Identified person B (low competence, high commitment), from one of my project to support in testing the bug fixes and run the test plan.
- After analysis showed larger changes, found person C (adequate competence, variable commitment) and requested guidance to complete the fix.

How I applied the models

Hersey–Blanchard (Situational Leadership)

- Directing: Person B (low competence, high commitment) — clear steps and short, testable tasks.
- Coaching: person A (medium competence, low commitment) — involve them in analysis and keep momentum with frequent check-ins.
- Supporting: person C (adequate competence, variable commitment) — ask for guidance and remove obstacles so they can contribute efficiently.

Application of Learnings from Leadership Modules

Leader in Me & Leading Cross Functional Teams

Cohen–Bradford (Influencing without authority)

- Discussed their constraints (their own timelines and delivery commitments).
- Identified what matters to them: visibility, appreciation, and rewards.
- Proposed a fair exchange and aligned expectations before work started.
- Agreed on timelines and handoffs to fit both teams' delivery plans.

► Outcome

- Successful delivery of the project.

Application of Learnings from Leadership Modules

Strategic Thinking & Creativity

Top Learnings:

1. X-Matrix
2. SCAMPER
3. BOOTSS Framework

Application example:

Use SWOT to identify challenges and shape the 2030 strategy

- ▶ Situation: Create the EPT strategic framework for Aspirations 2030
- ▶ Action taken:
 - Analyzed PT Global revenue trends and regional market challenges
 - Assessed the impact of senior leadership changes on revenue and hub focus
 - Identified BGSW focus areas and completed a SWOT (strengths, weaknesses, opportunities, threats)
- ▶ Outcome:
 - Arrived at a 4S (Stabilize, Strengthen, Scale up, Sustain) strategy
 - Defined the action points needed to achieve the strategy

Application of Learnings from Leadership Modules

Negotiation skills/Conflict management

Top Learnings:

1. Negotiation Principles
 1. BATNA (Best alternative to a Negotiated Agreement)
 2. ZOPA (Zone of Possible Agreement)
2. Circle of Influence in Stake holder management.

Application Example: Vendor Return Negotiation

- ▶ Situation — We bought a \$2,000 component from Mouser in late December; in January we learned it required an additional \$3,000 in accessories to make it functional, which wasn't approved in the budget.
- ▶ Goal — Return the original item and recover funds to purchase a standalone alternative.
- ▶ Constraints — Return window had passed; internal team initially said they couldn't help; vendor contact also declined at first.
- ▶ What I did (mapped to the models) —
 - ▶ BATNA: Used our long-term buyer relationship as leverage—highlighting the impact on future purchasing with Mouser if we couldn't resolve the return—so they had a clear incentive to make an exception.
 - ▶ ZOPA: Proposed a workable trade: we cover return shipping in exchange for an exception to the return deadline.
 - ▶ Circle of Influence: Reinforced our long-term buyer relationship.
- ▶ Result — Vendor agreed to accept the return and process the shipment back even though the deadline had been missed by over three months.

Application of Learnings from Leadership Modules

Resilient Leadership & Uncertainty Management

Top Learnings: Resilient Leadership

1. Psychological Safety
2. Cynefin (Kun-ev-in) Framework
3. Cognitive Flexibility and Mental Agility
 - Pause->Reframe the problem-> Realign the strategy

Top Learnings: Uncertainty Management

1. Positive BANI
2. Critical Thinking
3. OODA Loop

Application example: Application in progress

Capacity reductions across the globe, which is creating concerns on Job safety within the department. The forecast is uncertain for next year, Develop Psychological safe teams, use Cognitive Flexibility and Mental Agility and realign the strategy.

Action Plan (Next 30–60 Days)

3 specific actions you will take:

1. Improve Team Morale
2. Create High Performance teams (PT Platform Project)
3. Use habit stacking to develop a habit to improve creativity

How will you measure success?

1. Team happiness Index
2. Customer Satisfaction
3. Sticking to a habit for 45 days without breaking the chain

The background of the slide is a dark, textured surface with a pattern of diagonal lines in shades of brown and gold. Scattered across these lines are numerous small, glowing yellow and orange particles, giving the impression of a digital or scientific environment.

Thank You
