

Mid-Program Review

The 360° of Program Management

Bosch

17.04.2026

Introduction

The primary objective of this ppt would be to share application of the learnings in current/upcoming work situations. It is intended to drive reflection, application, and accountability

Some indicators:

Participant Name: Sanal Kumar Madathil

Manager Name : Berly Cherukara John

Role: Project Manager

Function/Department: MS/EHV-EM

What is your job role? What activities does it involve?

Current job role involves the following

- 1) Project management in Volkswagen inverter and DcDc converter for hybrid vehicles with full responsibility.
- 2) Software project management for Tata Garud localization project as extended support.

Who is your customer?

External clients (VW and Tata)

Module-wise Learning Application

Modules		Been able to apply	Identified areas to apply	No Scope to apply
Leadership	Leader in me	√		
	Resilient Leadership	√		
	Uncertainty Management		√	
	Strategic Thinking & Creativity			√
Professional	Leading Cross-functional teams		√	
	Negotiation Skills/Conflict Management	√		

Note : Use the tick symbol to mark your relevant responses

Application of Learnings from Leadership Modules

Leader in Me and resilient leadership

Top 2–3 learnings:

- 1) Mind Mastery for resilient leadership
- 2) Reflection on FLAB (Fear Limiting Belief Assumption Bias)

Application example:

- ▶ **Situation:** In the project I am handling , the product owner was a third party (UAES China Team), and I got responsible for managing the Tata customer project especially when the customer is so demanding. The requirements were always uncertain and the system lacked discipline.
- ▶ **Action taken:** Worked on to deal with threats and emotional response to deal with the customer. The constraints were dealt with overcoming the limiting beliefs. Gathered all the required parties to address the points on misunderstanding and poor decision making. Biases within the internal and external teams were neutralized to get the correct judgement
- ▶ **Outcome:** A systematic and better work split-up which affected the motivation of the projects positively. The team now has trust in leadership to move on further with the challenges.

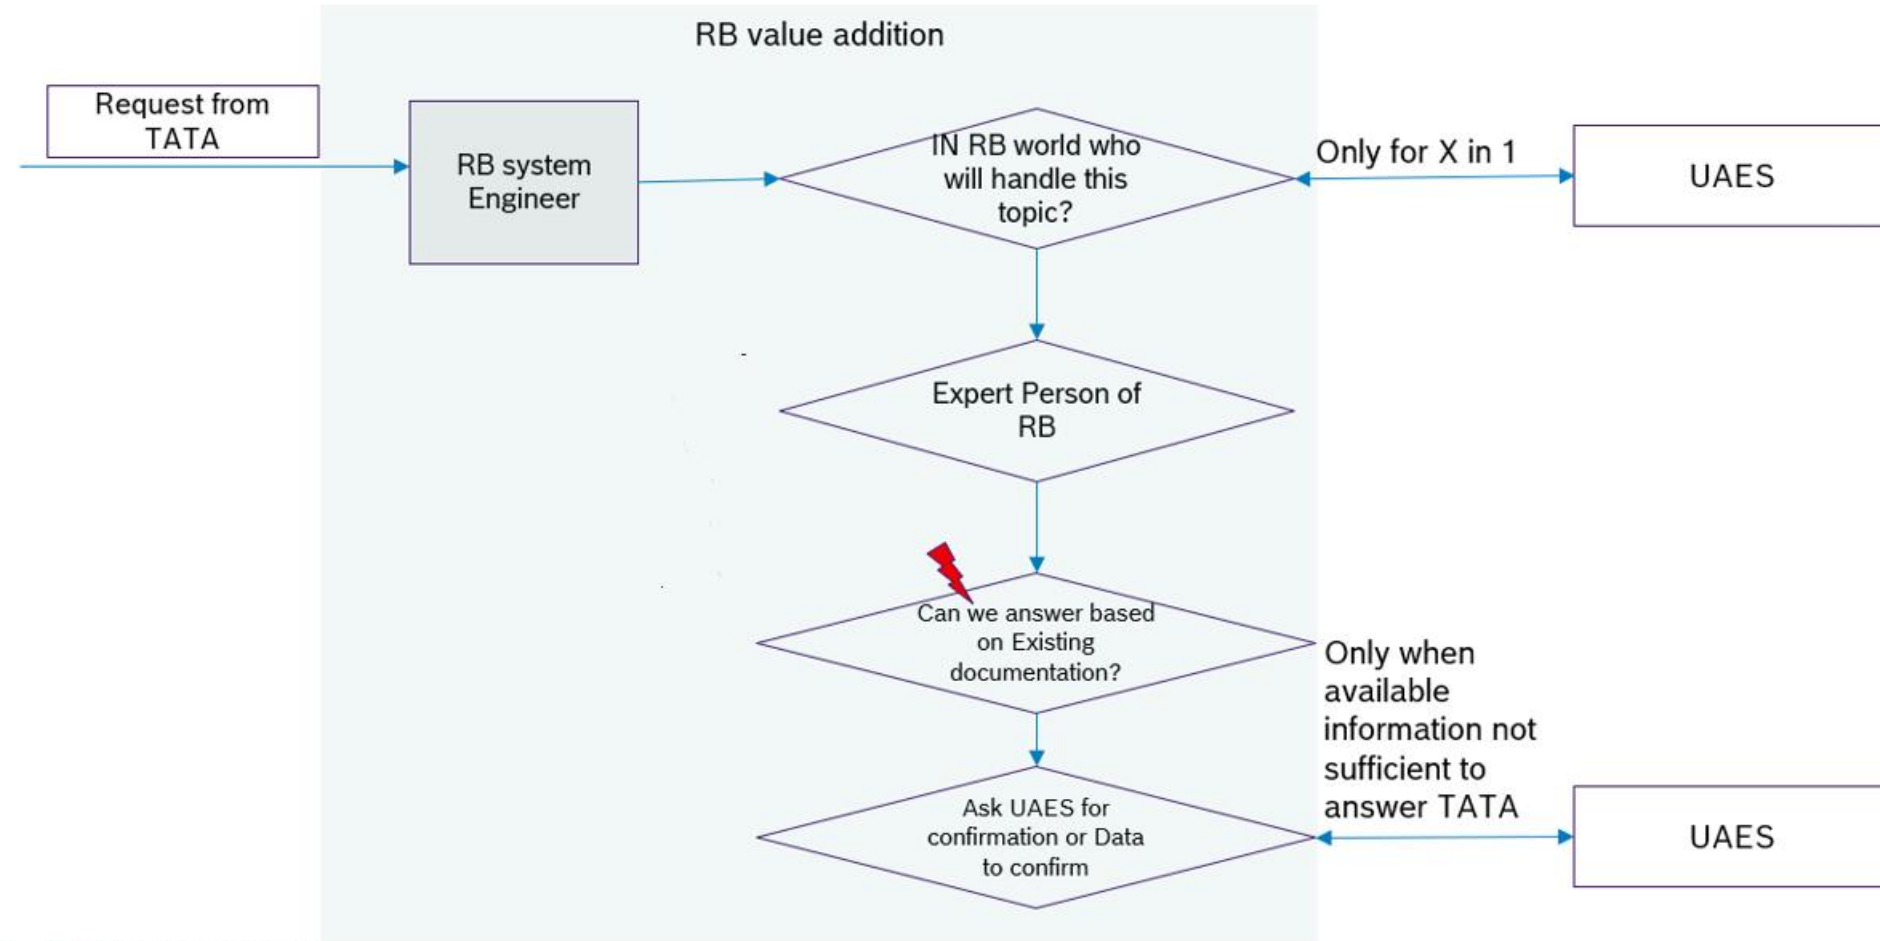

Application of Learnings from Leadership Modules

Taking charge of the situation

- The emotional response of the customer is dealt with empathy
- Clear responsibility split is made , also stopped limiting ourselves to certain boundaries
- Decisions are taken with continuous stakeholder agreement , with clearing all possible assumptions on the way and bringing a lot of transparency
- The biases towards certain parties does job in a certain way is eliminated. The cross functional teams started working as a single team.

Application of Learnings from Leadership Modules

Strategy derived

Application of Learnings from Professional Modules

Negotiation & Conflict Management

Top 2–3 learnings:

- 1) Interest V/S position for negotiation
- 2) BATANA (Best alternative to negotiated agreement)

Real scenario:

- ▶ **Conflict situation:** The software development team in China was not agreeing to the milestone dates provided by Tata customer.
- ▶ **Strategy used:** The management who had the authority to take decisions were approached and clear benefits and win-win situation for both the parties have been demonstrated. Then the customer was approached for negotiation, and we were able to reach the BATANA
- ▶ **Result:** Successful freeze or requirements with content planning milestones finalized

Application of Learnings from Leadership Modules

Application of conflict management methods

- Gathered the conflicts and escalations going on in the project
- Identified the critical areas and further steps taken to de-escalate the situation with the help of management.
- With respect to the customer demand , the suppliers were informed about what is in it for them as benefit and how we can mutually pace towards a win-win situation
- Different planning scenarios were put together in paper and came to the zone of possible agreement which was acceptable for the customer as well.

Action Plan (Next 30–60 Days)

3 specific actions you will take:

1. Start taking the ownership and coordinating/leading together the cross functional team in different organization/business units in my project
2. The project will keep on being uncertain due to dynamic nature of requirement. Apply scenario planning
3. Positive affirmations of BANI (Bendable, Attentive, Neuro-flexible, Interconnected)

How will you measure success?

Feedback with ratings from cross functional teams

Success rates of scenario planning

The background of the slide is a dark, textured surface with a pattern of diagonal lines. These lines are composed of small, glowing orange and yellow particles, giving the impression of a digital or scientific data visualization. The lines run from the top-left towards the bottom-right, creating a sense of depth and movement.

Thank You
