

Mid-Program Review

The 360° of Program Management

Bosch

Anoob Varughese (MS/EBX22-BEG)
21.04.2026

Introduction

Participant Name: Anoob Varughese (MS/EBX22-BEG)

Manager Name: Nagesh Kumar Murthy (MS/EBX2-BEG MS/EBX21-BEG)

Role: Sr. Project Manager

Function/Department: Automotive Powertrain ; MS/EBX-BEG

What is your job role? What activities does it involve?

Project management for customer engineering domain in automotive powertrain projects, with a team size of 16. Innovation management lead, Digital engineering lead, GenAI lead for project management community of practice.

Who is your customer? (e.g: Internal teams or external clients)

Internal partners (customers) from European Bosch regions primarily from Germany and Austria.

Module-wise Learning Application

Modules		Been able to apply	Identified areas to apply	No Scope to apply
Leadership	Leader in me	✓		
	Resilient Leadership		✓	
	Uncertainty Management	✓		
	Strategic Thinking & Creativity	✓		
Professional	Leading Cross-functional teams		✓	
	Negotiation Skills/Conflict Management	✓		

Note : Use the tick symbol to mark your relevant responses

Application of Learnings from Leadership Modules

Leader in Me & Resilient Leadership

Top learnings:

Recognize **FLAB** (fear, limiting beliefs, assumptions, biases) as a hidden filter that can distort decisions.

Practice **emotional intelligence**: pause to *respond* instead of react; use cognitive vs. emotional empathy appropriately.

Use **self-awareness** to name triggers in the moment and regain self-control.

Real scenario:

- ▶ In a team conflict near SOP, shifted from public performance talk to 1:1s and empathy-led questions (“What’s making delivery difficult?”).
- ▶ Strategy used: Addressed root causes by clarifying success, reassigning roles, and creating a shared priority dashboard in MS Planner.
- ▶ Result: Improved collaboration and psychological safety; reduced friction between lead and team.

Application of Learnings from Leadership Modules

Strategic Thinking & Creativity

Top learnings:

A workable strategy must pass the “**truck driver test**”: everyone should understand the goal in simple language.

Apply **market-based systems thinking**: prioritize based on the bigger picture, not isolated tasks.

Real scenario:

- ▶ The market outlook was uncertain, and our demand signals were mixed across multiple product classes. As a result, the team lacked a clear recommendation on which product class to prioritize for investment and capacity planning in the upcoming cycle.
- ▶ Strategy used: Used BOOTS + scenario planning to structure decisions. Defined a few plausible market scenarios, leading indicators, and product-class performance under each. Aligned on a primary priority, a secondary “watch” option, and clear pivot triggers.
- ▶ Result: Turned ambiguity into an executable plan; reduced opinion-driven debate via documented assumptions and review cadence.

Application of Learnings from Professional Modules

Uncertainty Management & Leading Cross-Functional Teams

Top learnings:

Use **VUCA/BANI** to frame uncertainty in modern programs (shifting requirements, disruptions, distributed teams).

Move from predictive to **adaptive planning**: keep structure but build short feedback loops and contingency paths.

Influence without authority by identifying stakeholder **currencies** (Cohen–Bradford model).

Real scenario:

- For a potential resignation in a critical role near SOP, created a simple **scenario-based response playbook** (stakeholder comms, dependency mapping, interim owners, temporary coverage, backfill options).
- Strategy used : Ran a **pre-mortem** (“Assume we miss the milestone—what went wrong?”) to surface and mitigate hidden risks early.
- **Result:** Continuity plan to keep decisions unblocked, maintain clear ownership, and minimize schedule shock while improving redundancy and documentation.

Application of Learnings from Professional Modules

Negotiation Skills & Conflict Management

Top learnings:

Separate **positions vs. interests**; use **BATNA/ZOPA** to reduce emotion and expand options.

Prepare **anchors** and **frames** as part of negotiation readiness (not manipulation).

Use **active listening** (reflect, clarify, summarize) to lower defensiveness and surface real needs.

Real scenario:

- In an incentives/compensation concern, acknowledged the issue, clarified interests (recognition, growth, fairness), and explored BATNA respectfully.
- Negotiated within control: offered a stretch ownership area with support (time/priority protection/stakeholder access) and set clear boundaries/backup planning.
- **Result:** Team member stayed engaged and gained recognition; concern escalated through proper channels without overpromising.

Action Plan (Next 30–60 Days)

3 specific actions you will take:

1. I will add a mandatory "Outcome Definition" section to every program or project charter I create or review, listing what the *receiving organization* will be able to do differently once the program is complete.
2. I will include at least one customer-centric KPI (acceptance scenario validation) as a formal milestone gate criterion, not just a delivery metric.
3. Using the **Cohen-Bradford Influence Model** and the **Team Canvas** framework, I will map the key stakeholders in my largest current program — identifying their *currencies* (what they value), their current engagement level, and one concrete influence action for each critical stakeholder.

How will you measure success?

Charters I create/review include an Outcome Definition + outcome KPIs, and the receiver/customer can confirm the value in one sentence.

I raise at least 1 meaningful cost/margin/benefit risk or assumption before finance flags it.

Complete a stakeholder map with currencies + one action per key stakeholder.

The background features a dark, textured surface with numerous diagonal lines running from the top-left towards the bottom-right. These lines are composed of small, glowing orange and yellow particles, giving the impression of a digital or scientific visualization. The overall effect is one of depth and movement.

Thank You
